

PURBECK WETSON BED

SAMPLE SIZE:	90x90mm (or 1:1 at A4)
SAMPLE SURFACE FINISH:	honed (approx 220 grit)
QUARRY LOCATION:	Purbeck, Dorset, England
GEOLOGY:	Cretaceous Limestone
COLOUR:	buff
POLISH ACHIEVABLE:	high
APPLICATIONS:	interior and exterior
BRE DATA:	available on request

Wetson Bed is a buff-coloured limestone which features a dense mix of whole and fragmented shell pieces that create a richly-textured surface. Like Purbeck Marble, Wetson Bed contains the Viviparus snail shell. Occasional darker accents add visual interest throughout the stone.

Wetson Bed and Thornback are quarried together. Like Thornback, Wetson Bed tends to be quite thin making it ideal for paving. Haysom Purbeck Stone recently produced Wetson Bed seats and paving for the West Front of Westminster Abbey.

RECENT PROJECTS: Richmond Church; Buckingham Gate; St John's College Oxford, Exeter Cathedral Quire Jubilee Pavement
