

EXTERIOR FINISHES: TUMBLED

Our Tumbled finish is applied after stone has been sawn or guillotined. Tumbling distresses and softens the edges and may leave some texturing to the surface, producing an antique effect.

The samples shown above have sanded surfaces, which give a flat matt surface. The sample to the left has been brushed, which enhances the stone's colour and geological features.

Purbeck stone is a limestone, which naturally weathers. Depending on its application and exposure, its surface appearance will change over time. Please contact us for samples, and further information.

SAMPLES: 100x100mm

STONE TYPES: Clockwise from left: Wetson Bed, Grub, Grub
