

EXTERIOR PAVING: NATURAL TOP CRAZY PAVING

Purbeck stone makes excellent crazy paving, with many of the layers naturally occurring in suitable shapes and thicknesses. We also mix in some pieces with sawn undersides and one sawn edge. Crazy paving is mainly 30mm to 60mm thick, but this can vary depending on the bed of stone used; it may be as little as 25mm or as much as 75mm. All pieces are random in shapes and sizes.

We estimate you'll be able to achieve between 8m² and 10m² per tonne.

UNIT SIZES: Random widths and lengths; thickness generally 30-60mm

FINISH: Natural Face

EDGES: Base, Sides and Ends- Natural Face

THICKNESS: generally 30-60mm

SAMPLE SIZE SHOWN: 1m²
