

EXTERIOR PAVING: RANDOM PAVING

Random paving is ideal for garden paths and patios, and is the most economical choice for exterior paving. It comes with a sawn or textured finish. It has random shapes, with natural edges and one or two sawn edges. Depending on available stock, the thickness varies from 20mm to 50mm. We estimate you'll be able to achieve between 8m² and 14m² per tonne, depending on paving thickness and your layout. Random Paving is sold per m²

UNIT SIZES: Random widths and lengths; thickness dependent on available stock

FINISH: Plain Sawn; Sanded; machine-textured finish eg Bush-Hammered or Bush-Chiseled. Dependent on available stock

EDGES: Base- Sawn; Sides- Natural and Sawn

THICKNESS: 20-50mm

SAMPLE SIZE SHOWN: 1m²
