

INTERIOR FLOORING: DOWNSVEIN

1000mm

Purbeck Stone is an excellent choice for interior paving. It is extremely durable, ages gracefully, and its rich fossil content is enhanced by a smooth finish. We can cut flooring to any thickness, shape and size, with coursed widths random lengths (as shown here) always a popular choice.

Downsvein has warm buff tones with a subtle texture of fossil shells. It has been used for paving for centuries, and makes particularly robust flooring.

We cut all our flooring to order, so if you would prefer to select specific beds, please visit the Our Stone page of our website for details. We also have sample panels of interior flooring laid within our showroom in Purbeck. Please get in touch if you'd like to visit, and for further details.
