

INTERIOR FLOORING: GREY PURBECK MARBLE

900mm

Purbeck Stone is an excellent choice for interior paving. It is extremely durable, ages gracefully, and its rich fossil content is enhanced by a smooth finish. We can cut flooring stone to any thickness or shape, with coursed widths random lengths (as shown here) always a popular choice.

Grey Purbeck Marble is rare, and makes beautiful flooring. Because it naturally occurs in smaller block sizes, this stone is most suitable for narrower coursed widths and shorter lengths.

We cut all our flooring to order. Please visit the Our Stone page of our website for details. We also have sample panels of interior flooring laid within our showroom in Purbeck. Please get in touch if you'd like to visit, and for further details.
